

Empowering the Next Generation of Entrepreneurs

Faculty and Students of Department of Commerce, Sri Aurobindo College (Evening) visiting Skillfeet Education Pvt Ltd

Sri Aurobindo College (Evening) is committed to fostering the all-round growth of its students by blending academic theory with hands-on practical experiences. The college's Principal, Prof. Arun Chaudhary, has consistently emphasised the importance of this balanced approach to education, recognising its role in nurturing well-rounded individuals. In particular, the Department of Commerce understands the unique and often demanding journey that students face when they choose to pursue entrepreneurship. The department acknowledges these challenges and aims to equip its students with the skills and insights necessary to thrive in the competitive world of business.

On September 30, 2024, Udhyam, the Entrepreneurship Cell of Sri Aurobindo College (Evening), had the privilege of visiting Skillfeet Education Pvt. Ltd., an organisation focused on empowering students with critical thinking, social skills, and emotional intelligence—key elements for their overall growth and future success. The field visit provided aspiring and early-stage entrepreneurs with valuable insights, resources, and networking opportunities. The event highlighted the challenges and achievements of launching a startup, with a focus on understanding the highs and lows of the entrepreneurial journey. Distinguished faculty members from the Department of Commerce—Dr. Vikas Joshiya, Mr. Varun Panwar, Ms. Sandhya Rao, and Ms. Bhawna Thakran—enthusiastically expressed their interest and volunteered to accompany the students, offering their guidance and mentorship throughout this enriching experience.

Prabhat Singh with Mayank Gupta

Prabhat Singh, President, The Entrepreneurship Cell introduced the objectives of the Cell and its importance in cultivating an entrepreneurial mindset among students. He also briefly elaborated on the objectives of the field visit and how students can gain immensely through such an interaction.

Mr. Mayank Gupta, the resource person, shared his entrepreneurial journey, offering insights into the challenges and triumphs that come with starting a business. During the event, he highlighted several success stories and the positive aspects of entrepreneurship, inspiring aspiring entrepreneurs to take the plunge. Starting a business offers several key advantages that make it an appealing path for many individuals. One of the most significant benefits is the opportunity to pursue one's passion and purpose, allowing entrepreneurs to align their work with their personal values and interests.

This sense of fulfilment often drives higher levels of motivation and creativity. Additionally, businesses have the potential for unlimited growth, with no fixed ceiling on success, enabling entrepreneurs to expand their ventures as far as their vision and efforts take them. Finally, owning a business provides unmatched flexibility and control, giving individuals the freedom to make their own decisions, set their schedules, and shape the direction of their enterprise. These factors together create a powerful combination that motivates many to take the entrepreneurial leap.

The field visit was highly interactive and engaging, with active participation of the students. The interactions provided insights and offered valuable guidance to students to think critically about their entrepreneurial goals.

The exposure was an eye-opening experience, offering valuable perspectives on both the rewards and challenges of starting a business. While entrepreneurship holds great potential for growth, creativity, and financial success, it also comes with challenges of financial instability, high stress, and uncertainty
